

Advanced Computer Applications

The Advanced Computer Applications course is a new, exciting and innovative course offering at the West Texas Training Center. The foundation of the course is built around the award winning Adobe Creative Suite and the Microsoft Suite of productivity software.

Where will the class be taught and what is the format?

- ▶ Taught in a double-block format (2 credits) at the West Texas Training Center
- ▶ Transportation provided by SAISD
- ▶ Course counts as required technology credit
- ▶ Qualifies for Dual Credit hours at Howard College (JRs and SRs only)

What do students learn in Advanced Computer Applications?

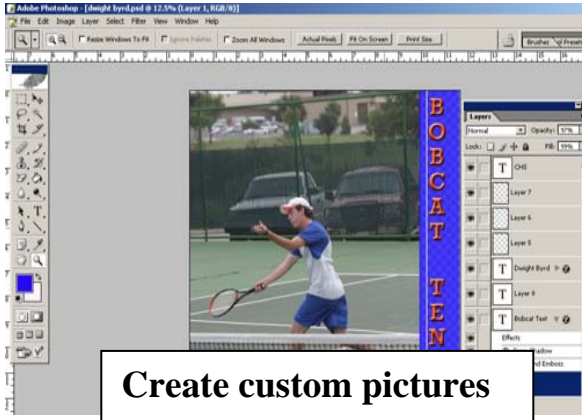

Students will receive valuable training using a variety of Adobe products in the areas of real-time professional video production, DVD authoring, digital imaging, web site design, and graphics arts design. In addition, students will receive intermediate to advanced training in the Microsoft Office Suite. In short, students will receive valuable, in-depth training in a wide variety of computer applications.
